VxRail vs Nutanix

Parameter	VxRail	Nutanix
Licencing	Licencing cost is an important factor	No additional licensing required
Solution Integration	• Good choice to extend and simplify an existing VMware infrastructure. • Mostly management is done via vCenter. • Separate application for software upgrades.	• Single operating system • Single management application • One application programming interface for integration
Enterprise Applications	Capable of integrating a broad range of applications.	Growth is in the development stage.
Stability	Function with manual intervention.	Once installed, is taken care of by itself.
Multi-hypervisor Flexibility	Only VMware	Supports multiple hyper visors like: Nutanix AHV, Hyper-V, VMware
Scalability	• Needs at least 3 nodes • Scale up to 64 nodes per cluster	• Better scalability • Start with a single node • Clusters of over 100 nodes in production
Vendor Supported Platforms	Only Dell EMC	Multiple e.g. -Nutanix, HPE, IBM, Cisco, Dell EMC etc.
Hardware Options	5 hardware series	• 11 appliance models
Pricing	Flexible pricing options	Bit expensive
